

BWWB Water Sources

- Black Warrior Basin
 - Sipsey Fork
 - Mulberry Fork
 - Inland lake/Blackburn Fork
- Cahaba Basin
 - Big Cahaba River
 - Little Cahaba River
 - Lake Purdy

System Information

- Average gallons of water delivered daily in 2017: 101.5 MGD
- People Served: 600,000*
- Square miles in service area: 759*
- Miles of water main (pipes) in system: 4,000*

*Approximations

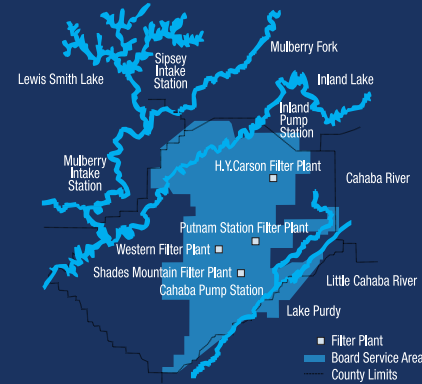

Source Water Assessment

A source water assessment has been updated for the water system. It is available for review at the BWWB's main office during normal business hours. The following is a list of the sources of raw water along with the susceptibility rating of the contaminant source and the contaminant sources:

- Inland Lake - low susceptibility (septic tanks); moderate susceptibility (boat launch)
- Cahaba River - moderate susceptibility (highways, secondary roads, and railroad)
- Mulberry Fork - moderate susceptibility (septic tanks); high susceptibility (strip mining, bridges, and highways)
- Sipsey Fork - moderate susceptibility (storm water runoff)

The BWWB is making a maximum effort to physically protect all of our critical assets.

SERVICE AREA MAP

Across

2. Lake Purdy is part of what BWWB water source?

4. The Environmental Protection Agency's Safe Drinking _____ is 1-800-426-4791.

6. What do the boxes represent on the Service Area Map?

7. How many counties does BWWB serve?

8. Who is the BWWB's general manager?

Down

1. What is a required process intended to reduce the level of a contaminant in drinking water?

3. What step of the treatment process places water in a clearwell?

5. What is water delivered through?
